

Notes for filling out the application for the recognition of the QAP according to BAM-GGR 001

- par. 1.2 Several crosses are possible when applying for a revised version, e.g. if you apply for an address change and a fundamental change of the QAP due to acquisition by another company.
- par. 1.2.1 An address change without location change could be caused by a local territorial reform, for instance.
- par. 1.2.2 An extension of the scope of the QAP recognition is of relevance, if you want to start a new activity (manufacturing, remanufacturing, reconditioning, repair, routine maintenance) or to produce a new type of dangerous goods packagings (e.g. 4G, 31HA1, 50A).
- The additional codes "T" and "V" (e.g. 50AT, 4GV) lead to additional types of dangerous goods packagings compared to a code without "T" or "V" (e.g. 50A, 4G) because additional or changed testing conditions apply and hence additional test instruction must be created or existing test instructions must be revised.
- The additional code „W“ (e.g. 1H2W) does not lead to new types of dangerous goods packagings, because the testing conditions are not altered compared to a code without "W" (e.g. 1H2).
- par. 1.2.3 A fundamental change to the QAP occurs, e.g. if testing processes are shifted (e.g. internal testing instead of external testing) or tests are carried out in a completely different way.
- par. 2 Information about the place of production is requested here. P.O. box addresses or deviating addresses of an applicant, e.g. the approval holder, are **not** suitable.
- par. 3 The applicant can be for instance an employee of the approval holder, for which the company specified under paragraph 2 is producing the dangerous goods packagings.
- par. 4 Information about the scope of the QAP recognition is requested here. If you apply for the first time, please specify the activities (manufacturing, remanufacturing, reconditioning, repairing and/or routine maintenance) and the types of dangerous goods packagings in encoded form (e.g. 1A1, 31HH1, 50G). In case of an application for prolongation you can simply reference the number and issuing date of the current QAP recognition. Also a reduction of the scope can be indicated here, e.g. that the company is no longer reconditioning 1A1.
- par. 6 If the applicant is not the invoice recipient an invoice take-over declaration by the invoice recipient is **mandatory**.
- par. 6.1 Please, see [this Wikipedia entry](#) for details about the VAT no.
- par. 7 The application need to be signed by the applicant. The application should preferably be sent by email to gsp-erkennung@bam.de.
